

QUANTUM HORIZON

Transforming Transactions,
Elevating Experiences

Quantum Horizon POS

This quote highlights your company's commitment to enhancing the way businesses handle transactions and create memorable customer experiences through innovative POS solutions.

Sales Processing

Transaction Processing: Allows businesses to ring up sales, accept payments, and generate receipts quickly and accurately.

Multiple Payment Methods: Supports various payment options, including cash, credit/debit cards, mobile wallets, and gift cards.

Split Payments: Permits customers to split their bills among multiple payment methods.

Returns and Refunds: Handles returns and refunds with ease, updating inventory and sales records accordingly.

Inventory Management

Real-time Inventory Tracking: Monitors stock levels in real-time, reducing the risk of overstocking or running out of products.

Barcode Scanning: Simplifies product entry and inventory management.

Stock Alerts: Sends notifications when items are running low or are out of stock.

Supplier Management: Helps manage relationships with suppliers, including ordering and restocking.

Reporting and Analytics

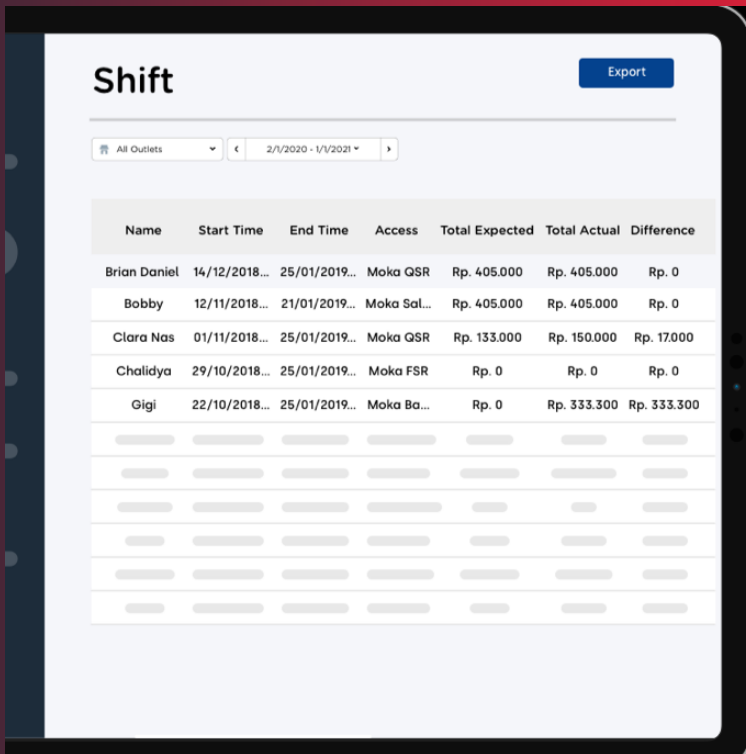

Sales Reports: Provides detailed sales reports, including daily, weekly, and monthly summaries.

Inventory Reports: Offers insights into inventory turnover, product performance, and reorder points.

Employee Performance: Tracks employee sales and performance metrics.

Customer Insights: Collects data on customer behavior and preferences for targeted marketing.

Employee Management

The screenshot displays a 'Shift' management interface. At the top, there is a title 'Shift' and an 'Export' button. Below the title, there are filters for 'All Outlets' and a date range '2/1/2020 - 1/1/2021'. The main content is a table with the following columns: Name, Start Time, End Time, Access, Total Expected, Total Actual, and Difference. The table contains five rows of data for employees: Brian Daniel, Bobby, Clara Nas, Chalidya, and Gigi. Each row shows their respective start and end times, access levels, and financial totals.

Name	Start Time	End Time	Access	Total Expected	Total Actual	Difference
Brian Daniel	14/12/2018...	25/01/2019...	Moka QSR	Rp. 405.000	Rp. 405.000	Rp. 0
Bobby	12/11/2018...	21/01/2019...	Moka Sal...	Rp. 405.000	Rp. 405.000	Rp. 0
Clara Nas	01/11/2018...	25/01/2019...	Moka QSR	Rp. 133.000	Rp. 150.000	Rp. 17.000
Chalidya	29/10/2018...	25/01/2019...	Moka FSR	Rp. 0	Rp. 0	Rp. 0
Gigi	22/10/2018...	25/01/2019...	Moka Ba...	Rp. 0	Rp. 333.300	Rp. 333.300

User Access Controls: Assigns different roles and permissions to employees to limit access to sensitive features.

Time Tracking: Records employee work hours for accurate payroll management.

Commission Tracking: Calculates and manages commissions for sales staff.

Shift Management: Handles shift changes and cash register reconciliation.

Customer Relationship Management (CRM):

Customer Profiles: Stores customer information for personalized service and marketing.

Loyalty Programs: Implements loyalty rewards and discounts for repeat customers.

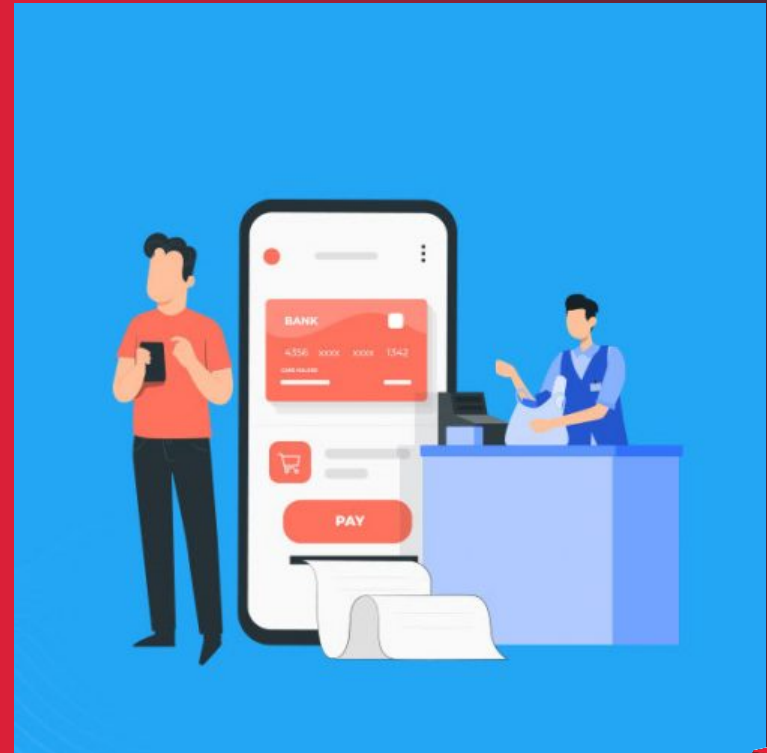

Email Marketing Integration: Connects with email marketing tools to send targeted promotions.

E-commerce Integration

Online Ordering: Allows customers to place orders and make payments online for pickup or delivery.

Synced Inventory: Ensures that online and in-store inventory levels are consistent.

Multi-Channel Sales: Manages sales across multiple channels, including physical stores and online market-places.

Security & Compliance

Data Encryption: Secures customer payment data and sensitive information.

PCI Compliance: Meets Payment Card Industry Data Security Standard (PCI DSS) requirements.

User Authentication: Requires user authentication to prevent unauthorized access.

Transaction Auditing: Keeps a log of all transactions for auditing purposes.

Mobile POS

Tablet and Smartphone Support:

Allows businesses to use mobile devices as POS terminals for greater flexibility.

Mobile Wallet Integration: Accepts payments through mobile wallets like Apple Pay and Google Pay.

Portable Receipt Printing: Prints receipts on-the-go using mobile printers.

Offline Mode

Operates Offline: Continues processing transactions even when the internet connection is unreliable or unavailable.

Syncs Data: Syncs data with the central system once the connection is restored.

Customization & Scalability

Customizable User Interface: Allows businesses to tailor the POS interface to their specific needs.

Add-on Modules: Supports additional features and integrations as the business grows.

Multi-location Support

Chain Management: Manages multiple store locations from a centralized dashboard.

Inventory Transfer: Facilitates inventory transfers between different locations.

Customer Support

Technical Support: Offers customer support, including phone, email, or chat, to resolve issues and answer questions.

Training Resources: Provides training materials and resources for staff and administrators.
